Syed Abrar Fiaz

(+880) 1516-512694 | abrarfiaz12@gmail.com | linkedin.com/in/2bsyed | github.com/2bsyed

Technical Skills

Languages: Python, Java, C++, JavaScript/TypeScript, SQL
Frameworks: FastAPI, Django, React, Next.js
Databases: PostgreSQL, MySQL, pgvector
Developer Tools: Git, Docker, Linux, Nginx
Libraries & AI: SQLAlchemy, Pydantic, scikit-learn, CatBoost, XGBoost, SHAP, LangChain, RAG, MCP, Ollama, LLM API integration

Education

Daffodil International University — Ashulia, Dhaka
B.Sc. in Computer Science & Engineering; CGPA: 3.59/4.00 — *2020 – 2026*

Govt. Sundarban Adarsha College — Jashore Board
Higher Secondary Certificate; GPA: 5.00/5.00 — *2018 – 2020*

Khulna Zila School — Jashore Board
Secondary School Certificate; GPA: 5.00/5.00 — *2010 – 2018*

Experience

Full-Stack Engineer Intern — Aug. 2026 – Oct. 2026
BooleanForce
- Developing Django backend APIs and services for NeaPure, a production application combining a MERN front end with a Django backend.
- Building an LLM-powered chatbot for product workflows and collaborating with frontend and product engineers to ship end-to-end features.

Back-End AI Engineering Intern — July 2026 – Present
FlyRank AI — *Remote*
- Selected for FlyRank AI's July 2026 Backend AI Engineering track, focused on backend systems and AI-powered product features.
- Working across backend service design, API development, and AI/LLM integration; onboarding and track assignments are in progress.

Back-End AI Engineer — July 2025 – 2026
DIU Student Projects — *Daffodil International University*
- Architected a multi-tenant SaaS backend, built four ML microservices, and deployed an on-premises MCP-orchestrated chatbot pipeline.

Projects

AI-Mentor – Multi-Tenant Academic SaaS | *Python, FastAPI, PostgreSQL, pgvector, Ollama, Next.js, Docker, MCP* — 2025 – 2026
- Built a multi-tenant academic SaaS with SGPA prediction, career mapping, 9-box talent evaluation, and an LLM-powered mentoring chatbot.
- Implemented four ML-backed FastAPI microservices, MCP orchestration, and RAG semantic search with PostgreSQL/pgvector; deployed the containerized platform on Ubuntu.

AI-Driven Network Anomaly Detection – Final Year Thesis | *Python, Autoencoder, XGBoost, scikit-learn, SHAP* — 2025 – 2026
- Developed a hybrid Autoencoder-XGBoost intrusion detection system on CSE-CIC-IDS2018, achieving 96.44% F1-score and 99.35% AUC-ROC at 18 MB peak RAM without a GPU.
- Cross-validated the approach on CIC-IDS-2017 and used SHAP for explainable AI analysis.

EduFlow – SaaS Coaching Management Platform | *PHP, MySQL, MVC, Multi-Tenancy* — 2026
- Designed and built a multi-tenant coaching platform from scratch, covering enrolment, batch management, attendance, fee processing, and administrative workflows with custom MVC architecture.

Extracurricular Activities

- Theatre performer with All Star DIU Club.
- Helped organize university events and activities with Daffodil Volunteer Club.
