SYED ABRAR FIAZ

AI / Backend Engineer · Python + LLM Systems

abrarfiaz12@gmail.com | linkedin.com/in/2bsyed | github.com/2bsyed | Dhaka, Bangladesh | Open to Remote

PROFESSIONAL SUMMARY

Python backend and AI/ML engineer with 2+ years shipping production LLM-powered SaaS. Built multi-tenant platforms with FastAPI microservices, pgvector + RAG, and on-prem LLM inference via Ollama. Skilled in async APIs, vector search, ML model deployment, and Dockerized delivery. Seeking remote AI/Backend Engineer roles where applied AI meets production-grade engineering.

EXPERIENCE

AI / Backend Engineer *2024 – 2026*

Daffodil Software Ltd · Dhaka, Bangladesh

- Led end-to-end build of AI-Mentor — a production multi-tenant SaaS used by multiple universities; features SGPA prediction, career path mapping, 9-box talent evaluation, and an LLM-powered mentoring chatbot.
- Designed MCP orchestration pipeline (entity resolution → intent detection → tool execution); ran phi3:mini on-prem via Ollama for zero cloud API dependency and full data privacy.
- Shipped 4 FastAPI microservices (grade, career, subject, 9-box) backed by CatBoost + scikit-learn models; served via async PostgreSQL + pgvector for semantic search and RAG, cutting latency vs sync DB calls.
- Implemented path-based multi-tenancy (/varsityname) with Next.js 16, Better Auth (Google OAuth 2.0), Drizzle ORM, Tailwind CSS 4, and shadcn/ui; containerised with Docker and deployed via Coolify on Ubuntu 24.04.
- Automated student assessment workflows and chatbot support — reduced faculty manual mentoring overhead while handling routine queries at scale.

EDUCATION

BSc in Computer Science & Engineering *May 2022 – May 2026*

Daffodil International University · CGPA: 3.59 / 4.00

HSC: GPA 5.00 · Govt. Sundarban Adarsha College · 2020 **SSC**: GPA 5.00 · Khulna Zila School · 2018

TECHNICAL SKILLS

Core Backend: Python, FastAPI, PostgreSQL / pgvector, Docker, Async APIs, Microservices Architecture, SQLAlchemy, asyncpg

AI / ML: LangChain, Ollama, RAG, MCP, CatBoost, XGBoost, scikit-learn, Sentence Transformers, SHAP / XAI, Autoencoder, Anomaly Detection, Feature Engineering, Model Deployment

Frontend: TypeScript, Next.js 16, React 19, Flutter / Dart, Tailwind CSS, shadcn/ui

Databases: PostgreSQL, pgvector, MySQL, Firebase Firestore, Hive, Vector Databases

DevOps & Tools: Git, Linux, Docker Compose, Coolify, Nginx, Vercel, SSH, CI/CD, OAuth 2.0

KEY PROJECTS

AI-Driven Network Anomaly Detection · Final Year Project · 2025 – 2026

Python · Autoencoder · XGBoost · scikit-learn · SHAP · CSE-CIC-IDS2018 · CIC-IDS-2017 github.com/2bsyed

- Proposed a hybrid Autoencoder–XGBoost IDS for resource-constrained institutional networks; achieved F1-score 96.44% and AUC-ROC 99.35% on CSE-CIC-IDS2018 at only 18 MB peak RAM — no GPU required.
- Cross-validated on CIC-IDS-2017; applied SHAP for feature interpretability and explainable AI (XAI), producing deployment-ready analysis for real-world low-cost edge environments.

Azan — Islamic Personal Assistant · Production Mobile App · 2023 – 2024

Flutter · Dart · Firebase Auth · Firestore · Hive · Geolocator · Provider (MVVM) · REST APIs github.com/2bsyed/Azan

- Shipped GPS prayer times, Qibla compass (magnetometer + tilt compensation), offline-first caching, bilingual EN/BN, real-time countdowns, and WCAG accessibility — MVVM with Provider state management.
- Background notifications, dark mode, font scaling; Firebase auth with Firestore sync for broad device support.

EduFlow — SaaS Coaching Management Platform · Open Source · 2023

PHP · MVC Architecture · MySQL · SaaS · Multi-tenant github.com/2bsyed/EduFlow

- Built multi-tenant coaching SaaS from scratch: student enrolment, batch management, attendance, fee processing, and analytics — production-grade MVC architecture without a framework.

solar-ufo — 2D Graphics Engine · Systems Programming · 2023

C++ · OpenGL · GLUT · Rendering Algorithms · Physics Simulation · Game Loop github.com/2bsyed

- 5,100+ line 2D graphics engine: DDA, Bresenham, and Midpoint Circle rendering; orbital physics simulation with collision detection and a full game loop — zero external graphics libraries.

AWARDS & LEADERSHIP

- Ranked 11th Overall & Section Champion — Take Off Programming Competition, Daffodil International University
- Ranked 15th — Unlock the Algorithm Programming Competition, Daffodil International University
- Class Representative, CSE Dept. Section 62_B — Daffodil International University · All 4 Years (2022–2026)
